

Evaluations, decisions, and work that has been completed so far and planned to be done until the next meeting

At this meeting, we reviewed the report we had previously prepared regarding the project. We clarified, resolved, and corrected any discrepancy.

Division of Labor and Responsibilities on Report:

Industrial Engineering Focus:

This group was responsible for drafting the "On-Hand Solution of the Problem". Their tasks included defining the initial system parameters, performing the step-by-step mathematical iterations, and managing the Z-Table and Loss Function lookups to determine the exact optimal order quantity (Q) and reorder point (R). They also authored the "Sustainable Development Goals" section to contextualize the project's impact on resource efficiency and industry innovation.

Computer Engineering Focus:

Responsible for designing the "Pseudocode of the Project" based on the established mathematical foundations. Tasks involved translating the manual iteration logic into a robust algorithmic structure, defining the precise input/output phases, and setting the loop termination criteria based on the stabilization of the z-score. The focus was on ensuring the programmatic flow accurately mirrors the manual solution without logical discrepancies.

Project Management

Management Order: Work Packages (WP), Task Distribution and Their Durations

The time in which the main work packages in the project will be carried out is given below as the “Worktime schedule”. The weeks in which the Meeting-minute report must be sent are shown in red. The deadline for the assignment in the Learning Management System is the last working day (Friday at 23:59) of the week shown in red. In each three minute-reports please include the name of the students by whom the work package(s) had been carried out. If you want, you can provide percentages if more than one student had had completed the task. Please do not include the name of a member, (if any) who has not participated to the task of the work package.

WORK-TIME SCHEDULE

Work Package No	Name of the Work Package	The job was done by whom? Name of the team leader, and team members	Weeks													
			1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Meeting with group members and planning of the division of labor	Team Leader: EFE KEMAL YILMAZ Team Members: AHMET CAN ÇAVDAR ARDA SÖĞÜT EMRE GÖRÜCÜ FATİH FURKAN ŞAHİN İBRAHİM ALP KARINCA YUNUS EMRE ÖZDEMİR														
2	Analyzing and solving the problem manually (by hand) on paper.	Team Leader: EMRE GÖRÜCÜ Team Members: ARDA SÖĞÜT YUNUS EMRE ÖZDEMİR														

3	Implementa tion of the table lookup of the "Z- Chart & Loss Function" values.	Team Leader: İBRAHİM ALP KARINCA Team Members: AHMET CAN ÇAVDAR ARDA SÖĞÜT EFE KEMAL YILMAZ EMRE GÖRÜCÜ FATİH FURKAN ŞAHİN YUNUS EMRE ÖZDEMİR													
4	The implementa tion of the QR algorithm to solve the problem.	Team Leader: Team Members:													
5	Writing a how-to-use documentat ion and testing the software to verify correctness of the code.	Team Leader: Team Members:
